PROFESSIONAL SUMMARY

Computer Science and Design Engineering graduate with an Honours Degree and 18 academic credits earned through six NPTEL certifications. Strong foundation in **Software Engineering, Python, Data Structures, Object-Oriented Programming, Full-Stack Development**, and AI/ML. Experienced in developing scalable AI-powered applications, RESTful APIs, and data-driven solutions using **Python, Django, TensorFlow, OpenCV, SQL, and Machine Learning**. Proven problem-solving, debugging, and collaboration skills through internships, academic projects, and hackathons. **Passionate about building innovative, reliable software solutions and contributing to high-impact engineering teams.**

TECHINICAL SKILLS

Programming Languages

- Python
- C++

Data Analytics

Power BI

Data Base

- MYSQL
- oracle SQL
- Bootstrap

Data Science

- AI
- ML
- Deep Learning

EDUCATION

Bachelor of Engineering in Computer Science and Design

12/2022 – 04/2026

ATME College of Engineering

Mysuru

- CGPA: 8.9
- Expected Graduation: April 2026

Pre-University (XII)

06/2020 – 03/2022

K. Puttaswamy PU College

Mysuru

- 84.66%

S.S.L.C

2019 – 2020

Sri Paramahansa Vidyanikethana

Mysuru

- 81.44%

INTERNSHIP EXPERIENCE

Intern

09/2025 – 12/2025

Ediglobe | IIT Kharagpur

Remote

- Developed and deployed an AI-powered car price prediction system with 10% improved forecasting accuracy and engineered five RESTful APIs using Django to integrate the model seamlessly into web-based applications, ensuring scalable backend processing and secure API communication.
- Developed and deployed an AI-powered car price prediction system that improved forecasting accuracy by 10% across 10,000+ listings, and engineered five RESTful APIs used by 50+ daily active users

Software Developer Intern

Futise Technologies

11/2025 – 06/202
Remote

- Developed **Karcha Pani**, a full-stack expense management application enabling users to record, update, and track daily expenses with real-time spending summaries and historical expense analytics.
- Implemented **CRUD operations**, integrated a relational database for secure expense management, and built an **Excel export** feature to generate downloadable financial reports for users.
- Collaborated throughout the **Software Development Life Cycle (SDLC)**, including requirement analysis, feature development, testing, debugging, and performance optimization to deliver a scalable and user-friendly application

ACADEMIC PROJECTS

AI-Based Traffic Management System Detecting Emergency Vehicle

03/2025 – 01/2026

Team Project | Team Lead | ATMECE

- Successfully developed and presented a Major AI-based system using Python, Pygame, OpenCV, TensorFlow, and YOLO, receiving appreciation from the VTU External Examiner; further published the research in Springer format at the 10th International Conference on Smart Trends in Computing and Communication (SmartCom 2026), with the paper indexed and currently under review for Scopus indexing

Karcha pani (AI Based Expenditure Calculation)

01/2026 – 06/2026

- Developed **Karcha Pani**, a full-stack expense management application with CRUD functionality, real-time expense tracking, database integration, and Excel report generation, following SDLC best practices.

Interior Design Web Application

08/2024 – 01/2025

- Led a team project at ATMECE to design and develop a web-based application for interior designers and architects using Python and Gradio, integrating Machine Learning algorithms for intelligent design visualization

KEY ACHIEVEMENTS

Academic Achievements

- Scored 100/100 in Mathematics (Sem 1-3); Current CGPA: 8.89.

Hackathons & Technical Competitions

- Participated in 4 Hackathons (1 Runner-Up, 3 Top 3 finishes).
- Competed in 2 Idea Pitch and 1 Technical Presentation competitions.

Event Host & Master of Ceremonies (MC)

- Successfully hosted and anchored multiple college and inter-college events, showcasing strong communication, stage presence, and leadership abilities.

COURSE CERTIFICATION

Data Structures

NPTEL

OOPS(C++)

NPTEL

Python

NPTEL

Cloud Computing

NPTEL

Natural Language Processing

NPTEL

Data Analytics with Python

NPTEL
